COMPANY PROFILE

2025

Where innovation meets execution, your growth our technology.

Innovation Unframed

As an official Frappe Partner, we build all our solutions on the Frappe Framework, using its powerful low-code architecture to develop ERPNext systems as well as our own products like Visitor Concierge, POS, Digital Tailoring, and MedFit.

About Us

We offer a comprehensive suite of technology solutions designed to support diverse business needs. Our expertise includes fully customized ERPNext implementations, ensuring every client receives a system tailored to their exact processes. We also build powerful in-house products, including Visitor Concierge for smart visitor management, our POS solution for smooth and reliable sales operations, the Digital Tailoring System for complete production and workflow control, and MedFit for automated medical certification processing. Each service is built with equal attention, innovation, and quality, providing clients with reliable, efficient, and future-ready digital solutions.

Frappé

ERPNext

ERPNext is a comprehensive, open-source enterprise resource planning system built on the Frappé Framework, designed to manage every core function of a business from one centralized platform. It covers accounting, HR and payroll, sales, purchase, inventory, projects, manufacturing, CRM, customer service, and more, all integrated seamlessly. With its customizable workflows, clean user interface, and real-time reporting, ERPNext helps organizations simplify daily operations, reduce manual work, improve accuracy, and achieve full visibility across departments. It is flexible, scalable, and suitable for businesses of any size or industry.

VISITOR CONCIERGE

Visitor Concierge is our in-house visitor management software, developed on the Frappe Framework and officially registered as a Qatari product. It is designed to create a smooth and efficient visitor experience by enabling seamless interaction between the host and the visitor without any hassle. The system supports advance registrations, approvals, check-ins, and complete visit records, ensuring better security, faster processes, and a more organized flow for every visit.

Features

- Advance Visitor Registration: Pre-register guests to speed up entry and reduce wait times.
- Automated Approval Workflow: Digitally review and approve visitor requests with minimal manual work.
- Seamless Check-In/Out: Fast QR or ID-based check-in for smooth arrivals and departures.
- Real-Time Notifications: Hosts get instant alerts when visitors check in.
- Comprehensive Visit Records: Securely log all visits for compliance and future reference.
- Customizable Access Levels: Set permissions based on visitor type, purpose, or department.
- Badge Printing Integration: Automatically generate badges with photos and access details.
- Analytics & Reporting: Access dashboards showing visitor flow, frequent visits, and peak hours.
- Secure Data Management: Built on Frappe for strong data privacy and regulatory compliance.
- Multi-Device Compatibility: Works on desktops, tablets, and mobile for easy access.
- Hardware Independent: Runs without relying on specific or proprietary hardware.

DIGITAL TAILORING SYSTEM

Our Digital Tailoring System is built to support tailoring units that operate with a structured, manufacturing-style workflow. The platform manages the complete production cycle, starting from measurement capture and job order creation, and moving through every stage of garment preparation such as cutting, stitching, finishing, quality checks, ironing, and packaging. It provides clear task allocation, real-time progress tracking, and smooth coordination between all roles involved, ensuring that each step is completed accurately and on time. By replacing manual tracking with a clean, organized digital process, the system helps tailoring workshops reduce errors, maintain quality standards, and deliver faster, more consistent results across all branches.

MedFit Medical Certification System

MedFit is a complete digital solution that automates Qatar's mandatory medical testing process for Residency and Work Permits. It brings Reception, Laboratory, Radiology, and Administration onto a single unified platform, ensuring fast registration, accurate applicant verification, and smooth coordination across all departments. Medfit User Guide

MedFit seamlessly connects with SCH services, X ray systems (PACS/RIS), and blood analyzers using HL7 and ASTM standards. This allows automatic order creation, real time data exchange, and instant result updates without manual intervention. Repeat cases, status changes, and test reviews are handled smoothly through structured workflows.

With built in dashboards, reporting tools, and role based user screens, MedFit gives full visibility over daily operations. Running on a high availability clustered server environment with automated failover and secure backup, it ensures reliability, data integrity, and round the clock uptime.

Overall, MedFit transforms medical centers into efficient, organized, technology driven environments that reduce waiting time, minimize errors, and provide a seamless experience for both staff and applicants.
